

Dear KORG Pa3X Owner,

Thank you very much for using the **New Eve Party 2012** SongBook file and Favorite Style bonus package, containing 15 new Styles and over 150 SongBook entries! These Styles, mostly consisting in Contemporary Hits, Disco, Dance, Latin and Latin Dance, are dedicated to your performance in the ballroom during the New Year Night. We hope you will enjoy them as much as your audience will!

Note: This package is only intended to be loaded into a Pa3X. Loading it to any other instrument could cause problems and is not recommended.

Here is how to load this package.

1) Backup the data contained in the internal memory of your Pa3X, by using the Media > Utility > Full Resource Backup command. As an alternative, use the Media > Save > Save All procedure, and choose the data you wish to save.

2) Use the Media > Load > Load .SET procedure to load the "New Eve Party 2012.set" file. When loading this file, the SongBook will be deleted and replaced by the one contained in the **New Eve Party 2012** package; all Styles in the Favorite Style bank #10 will be deleted and replaced by the ones contained in the package.

Please note that you can mix the data of the package with the existing ones. For example, you can load the Styles into your preferred Favorite or User Style bank, by using the Load > Load Bank or Load Single Style procedure.

Also, you can use the SongBook Editor software to mix the existing and new SongBook entries. In this case, first of all load the Styles to your preferred locations in the Pa3X (we suggest the default Favorite Style bank #10). If you load the Styles in locations other than the default ones, please use the SongBook Editor to edit any reference to the Styles, and link the entries to the actual position of the Styles. Please refer to the instructions of the SongBook Editor software for more information.

Note: The **New Eve Party 2012** SongBook refers to standard Factory Styles. If you customized your Factory Styles, the SongBook might not work correctly.

Enjoy!

The Korg Italy Team
